

Industrial IP67-rated 6-Port 10/100/1000T Managed Ethernet Switch (-40~75 degrees C)

Performance Not Affected by Industrial Conditions

The Industrial Managed Ethernet Switch comes with an IP67-rated industrial case, 6-port 10/100/1000T, and **static Layer 3 routing**, providing a high level of immunity against electromagnetic interference and heavy electrical surges which are usually found on plant floors or in curb-side traffic control cabinets. The Industrial Managed Ethernet Switch can be easily mounted on a DIN rail or wall taking up less space. It provides a quick, safe, cost-effective and high-performance network solution to IP security surveillance for small businesses and enterprises.

Waterproof and Dustproof RJ45 Ethernet Connector and Shielded Plug

The Industrial Managed Ethernet Switch is equipped with a 6-port 10/100/1000BASE-T auto-negotiation waterproof and dustproof RJ45 connector. These shielded RJ45 plugs can make the general UTP cable waterproof and dustproof. When connected to the waterproof and dustproof RJ45 connector, it provides tight and strong connection, and comes with the industrial protection rating of IP67 capable of withstanding humidity, dirt, dust, shock, vibrations, heat and cold.

Physical Port

 6-port 10/100/1000BASE-T, waterproof and dustproof RJ45 copper

Hardware Conformance

- IP67-rated aluminum case
- Redundant power design
 - 9 to 48V DC, redundant power with polarity reverse protect function
 - Active-active redundant power failure protection
 - Backup of catastrophic power failure on one supply
 - Fault tolerance and resilience
 - 24V AC power input acceptable
- DIN-rail and wall-mount design
- Supports Ethernet ESD protection of 6000V DC
- -40 to 75 degrees C operating temperature

Layer 3 IP Routing Features

 Supports maximum 32 static routes and route summarization

Layer 2 Features

- Prevents packet loss with back pressure (half-duplex) and IEEE 802.3x pause frame flow control (full-duplex)
- High performance of Store-and-Forward architecture, and runt/CRC filtering that eliminates erroneous packets to optimize the network bandwidth
- Storm control support
 - Broadcast/Multicast/Unicast
- Supports VLAN
 - IEEE 802.1Q tagged VLAN
 - Up to 255 VLANs groups, out of 4095 VLAN IDs
 - Provides Bridging (VLAN Q-in-Q) support (IEEE 802.1ad)
 - Private VLAN Edge (PVE)
 - Protocol-based VLAN
 - MAC-based VLAN
 - IP subnet-based VLAN
 - Voice VLAN
- Supports Spanning Tree Protocol
 - IEEE 802.1D Spanning Tree Protocol (STP)
 - IEEE 802.1w Rapid Spanning Tree Protocol (RSTP)
 - IEEE 802.1s Multiple Spanning Tree Protocol (MSTP), spanning tree by VLAN

Environmentally Hardened Design

The Industrial Managed Ethernet Switch is able to protect itself from dust and water ingress, and to operate under the temperature range from **-40 to 75 degrees C**. All these features ensure the highest level of reliability for mission-critical applications in any difficult environment.

Dual Power Input for High Availability Network System

The Industrial Managed Ethernet Switch features a strong dual power input system (**Dual 9~48V DC, 24V AC**) incorporated into customer's automation network to enhance system reliability and uptime. For example, when DC Power 1 fails to work, the hardware failover function will be activated automatically to keep powering the Industrial Managed Ethernet Switch via DC Power 2 alternatively without any loss of operation.

SMTP/SNMP Trap Event Alert

Though most NVR or camera management software offers SMTP email alert function, the Industrial Managed Ethernet Switch further provides event alert function to help to diagnose the abnormal device owing to whether or not there is a break of the network connection, or loss of power.

SMTP/SNMP Trap Event Alert

- BPDU Guard

• Supports Link Aggregation

- 802.3ad Link Aggregation Control Protocol (LACP)
- Cisco ether-channel (static trunk)
- Maximum 3 trunk groups, with 2 ports for each trunk
- Up to 4Gbps bandwidth (full duplex mode)
- Provides port mirror (many-to-1)
- Port mirroring monitors the incoming or outgoing traffic on a particular port
- Loop protection to avoid broadcast loops
- Supports ITU-T G.8032 ERPS (Ethernet Ring Protection Switching)
- IEEE 1588 and Synchronous Ethernet network timing

Quality of Service

- Ingress shaper and egress rate limit per port bandwidth control
- 8 priority queues on all switch ports
- Traffic classification
 - IEEE 802.1p CoS
 - ToS/DSCP/IP precedence of IPv4/IPv6 packets
 - IP TCP/UDP port number
 - Typical network application
- Strict priority and Weighted Round Robin (WRR) Cos policies
- Traffic-policing policies on the switch port
- DSCP remarking

Multicast

- Supports IGMP snooping v1, v2 and v3
- Supports MLD snooping v1 and v2
- Querier mode support
- IGMP snooping port filtering
- MLD snooping port filtering
- MVR (Multicast VLAN Registration)

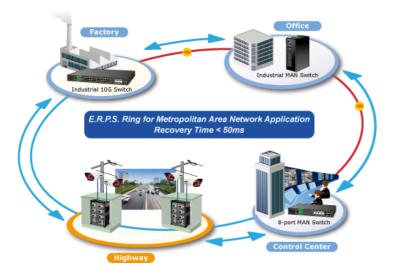

Security

- Authentication
 - IEEE 802.1x port-based/MAC-based network access authentication
 - IEEE 802.1x authentication with guest VLAN
 - Built-in RADIUS client to cooperate with the RADIUS servers
 - RADIUS/TACACS+ users access authentication
- Access Control List
 - IP-based Access Control List (ACL)
 - MAC-based Access Control List (ACL)
- Source MAC/IP address binding
- DHCP Snooping to filter distrusted DHCP messages
- Dynamic ARP Inspection discards ARP packets with

Featuring Fast Recovery for Critical Network Applications

The Industrial Managed Ethernet Switch supports redundant ring technology and features strong, rapid self-recovery capability to prevent interruptions and external intrusions. It incorporates advanced ITU-T G.8032 ERPS (Ethernet Ring Protection Switching) technology, Spanning Tree Protocol (802.1s MSTP), and redundant power input system into customer's industrial automation network to enhance system reliability and uptime in harsh factory environments. In a certain, simple Ring network, the recovery time of data link is within 20ms.

IPv6/IPv4 Dual Stack

Supporting both IPv6 and IPv4 protocols, the Industrial Managed Ethernet Switch helps data centers, campuses, telecoms, and more to experience the IPv6 era with the lowest investment as its network facilities need not be replaced or overhauled if the IPv6 FTTx edge network is set up.

Layer 3 IPv4 and IPv6 VLAN Routing for Secure and Flexible Management

The Industrial Managed Ethernet Switch not only provides ultra high transmission performance, and excellent Layer 2 and Layer 4 technologies, but also Layer 3 IPv4/IPv6 VLAN routing feature which allows to cross over different VLANs and different IP addresses for the purpose of having a highly-secure, flexibly-managed and simple networking application.

Robust Layer 2 Features

The Industrial Managed Ethernet Switch can be programmed for advanced switch management functions such as dynamic port link aggregation, Q-in-Q VLAN, private VLAN, Multiple Spanning Tree Protocol (MSTP), Layer 2 to Layer 4 QoS, bandwidth control and IGMP/MLD Snooping. Via the link aggregation of supporting ports, the Industrial Managed Ethernet Switch allows the operation of a high-speed trunk to combine with multiple fiber ports and supports fail-over as well.

invalid MAC address to IP address binding

- IP Source Guard prevents IP spoofing attacks
- IP address access management to prevent unauthorized intruder

Management

- IPv4 and IPv6 dual stack management
- Switch Management Interfaces
 - Telnet command line interface
 - Web switch management
 - SNMP v1, v2c, and v3 switch management
 - SSH/SSL secure access
- IPv6 address/NTP management
- Built-in Trivial File Transfer Protocol (TFTP) client
- BOOTP and DHCP for IP address assignment
- System Maintenance
 - Firmware upload/download via HTTP/TFTP
 - Reset button for system reboot or reset to factory default
 - Dual images
- DHCP relay and option 82
- User privilege levels control
- NTP (Network Time Protocol)
- Link Layer Discovery Protocol (LLDP) and LLDP-MED
- Network diagnostic
 - Cable diagnostic technology provides the mechanism to detect and report potential cabling issues
 - ICMPv6/ICMPv4 remote ping
- SMTP/Syslog remote alarm
- Four RMON groups (history, statistics, alarms and events)
- SNMP trap for interface link up and link down notification
- Smart Discovery Utility for deployment management

Powerful Security

The Switch offers a comprehensive Layer 2 to Layer 4 Access Control List (ACL) for enforcing security to the edge. It can be used to restrict network access by denying packets based on source and destination IP address, TCP/UDP ports or defined typical network applications. Its protection mechanism also comprises 802.1X Port-based and MAC-based user, and device authentication. With the private VLAN function, communication between edge ports can be prevented to ensure user privacy. The Industrial Managed Ethernet Switch also provides DHCP Snooping, IP Source Guard and Dynamic ARP Inspection functions to prevent IP snooping from attack and discard ARP packets with invalid MAC address. The network administrators can now construct highly-secure corporate networks with considerably less time and effort than before.

Excellent Traffic Control

The Industrial Managed Ethernet Switch is loaded with powerful traffic management and QoS features to enhance connection services by telecoms and ISPs. The QoS features include wire-speed Layer 4 traffic classifiers and bandwidth limit that are particularly useful for multi-tenant units, multi-business units, Telco and network service providers' applications. It also empowers the industrial environment to take full advantage of the limited network resources and guarantees the best performance in VoIP and video conferencing transmission.

Efficient and Secure Management

With built-in Web-based management interface, the Industrial Managed Ethernet Switch L2+ Managed Switch offers an easy-to-use, platform-independent management and configuration facility which includes Web and SNMP management interfaces. The SNMP can be managed via any management software based on the standard of SNMP Protocol. For reducing product learning time, it offers Cisco-like command via Telnet and customer does not need to learn new console command. Moreover, it also offers secure remote management by supporting SSH, SSI and SNMP v3 connections which encrypt the packet content at each session.

1588 Time Protocol for Industrial Computing Networks

The Industrial Managed Ethernet Switch series is ideal for telecom and Carrier Ethernet applications, supporting MEF service delivery and timing over packet solutions for IEEE 1588 and synchronous Ethernet.

Modbus TCP provides Flexible Network Connectivity for Factory Automation

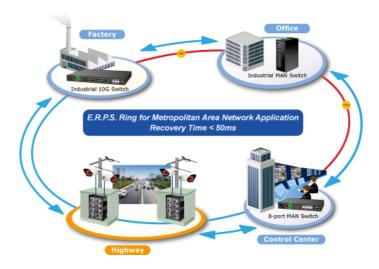

With the supported Modbus TCP/IP protocol, the Industrial Managed Ethernet Switch series can easily integrate with SCADA systems, HMI systems and other data acquisition systems in factory floors. It enable administrators to remotely monitor the industrial Ethernet switch's operating information, port information and communication status, thus easily achieving enhanced monitoring and maintenance of the entire factory.

Applications

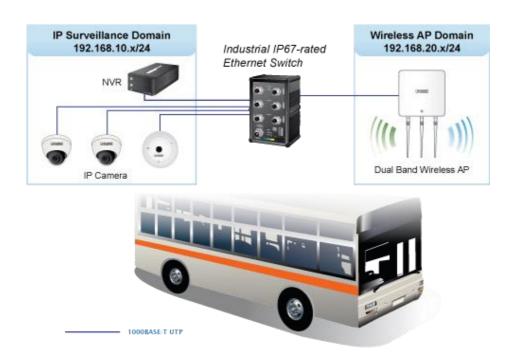

High Availability Networking Solution for Surveillance System

The Switch has the capability to rapidly recover itself in case there are interruptions or external instrusions. As the ITU-T G.8032 ERPS is employed, the reliability and uptime of the network can be greatly enhanced. Thus, the Industrial Managed Ethernet Switch, with its redundant connection and high bandwidth, is ideal for building an IP-based surveillance infrastructure in public transportation.

Layer 2+ VLAN Static Routing

With the built-in robust Layer 3 routing protocols, the Industrial Managed Ethernet Switch ensures reliable routing between VLANs and network segments. The routing protocols can be applied by VLAN interface with up to 32 routing entries. The Industrial Managed Ethernet Switch, certainly an ideal solution for industries, offers greater security, control and bandwidth conserdvation, and high-speed uplink.
